The Quickest way to transfer Contacts and Resumes.....

Did you know it takes more than 1 minute to enter any resume manually into your Contact Manager? ResumeGrabber enters the contact details and attaches the resume in your Contact Manager in less than 8 seconds.

How ResumeGrabber helps Recruiters?

ResumeGrabber automates all steps involved in manual data entry. It enables any recruiter to build a large candidate database and spend more time on interviewing and selecting the best candidate for the open position.

ResumeGrabber intelligently extracts contact details and resume in any format and posts it onto the Online ATS / Job Board / ACT! / GoldMine / Outlook and other database. Just highlight the contact details on the resume and click the GO Icon on the ResumeGrabber toolbar, the product does the rest.

ResumeGrabber allows recruiters to pro-actively build a candidate database...

Since ResumeGrabber makes it easy to enter resumes into a database, we found that many companies take advantage of this to build a database of all job applicants. This enables them to search their database in the future if they are looking for people with similar skills.
